Polymer Li-ion Battery Specification

Model: LP605590

Capacity: 3500mAh

1. Scope

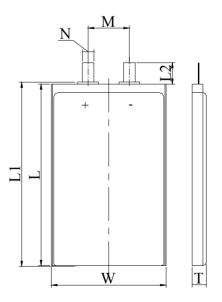

This product specification defines the requirements of the rechargeable polymer lithium-ion battery

2. Product Basic Characteristics

No.	Item		Characteristics		Remark
2.1	Model		LP605590		
2.2	Consister	Nominal Capacity	3500	mAh	0.2C ₅ A
2.2	Capacity	Minimum	3450	mAh	0.2C5A
2.3	Nom	inal Voltage	3.7	V	
2.4		Weight	Approx.68	g	
2.5	Internal Impedance		\leq 60	mΩ	AC 1KHz
		Length	≤ 91	mm	
2.6	Dimension	Width	≤ 55.5	mm	
		Thickness	≤ 6.3	mm	
	Charge	Maximum Current	3500	mA	$1C_5A$ (CC&CV)
2.7		Limited Voltage	4.200±0.020	V	
		End-of Current	70	mA	
2.8	Discharge	Maximum Current	7000	mA	2.0C ₅ A
2.0		End Voltage	2.750±0.005	V	
2.9	Operation Temperature	Charge	$0 \sim 45$	°C	
2.9		Discharge	-20 ~ +60	°C	
2.10	Storage Temperature	1 month	$-20 \sim +60$	°C	
		3 month	-20 ~ +45	°C	
		12 month	-20 ~ +25	°C	
2.11	Storage Relative Humidity		65±20	%	

3. Shape and Dimensions (Unit: mm)

Item	Specification	
Т	Max6.3	
W	Max55.5	
L	Max91	
L1	Max92	
L2	10±1	
М	30±1	
N	4±0.5	

4. Appearance

It shall be free from any defects such as remarkable scratches, breaks, cracks, discoloration, leakage, or middle deformation

5. Specification

5.1 Electrical Characteristics

No.	Item	Criteria	Test Instructions
5.1.1	1C ₅ A rate discharge capacity	Discharge Time≥57min	Full charge at 20 ± 5 °C, rest for an hour, then discharge at the same temperature with $1.0C_5A$ to $2.75V$
5.1.2	High temp. discharge capacity	Discharge Time≥54min	Full charge at 20 ± 5 °C, store at 55 ± 2 °C for 2h, then discharge at the same temperature with $1.0C_5A$ to 2.75 V
5.1.3	Low temp. discharge capacity	Discharge Time≥4.25h	Full charge at 20 ± 5 °C, store at -10 °C ±2 °C for $16h\sim24h$, then discharge at the same temperature with $0.2C_5A$ to $2.75V$
5.1.4	Cycle Life	≥500 Cycles(0.5C₅A) ≥800 Cycles(0.2C₅A)	After full charge, rest for 10 min, then discharge at constant current to 2.75V, rest for 10 minutes. Repeat above steps until the two consecutive cycles of discharge time is less than the regulated time. (500 cycles≥96min,800 cycles≥240min)
5.1.5	Capacity Retention	Discharge Time≥4.5 h	After fully charged, store the battery at $20\pm5^{\circ}$ C for 28 days. Then discharge it with $0.2C_5A$ to $2.75V$ and record the discharging time.

5.2 Acclimatization Characteristics

No.	Item	Criteria	Test Instructions
Т	High Temp and	No deformation, no rust,	After full charge, store at $40^{\circ}C \pm 2^{\circ}C(90\% - 95\% RH)$ for 48h.
5.2.1		no fire or explosion;	After test, place at 20°C±5°C for 2h and then discharge with
	Ingli Humaity	Discharge time ≥36min	1C ₅ A to end-voltage
		No deformation, leakage,	Batteries are vibrated 30 min in three mutually perpendicular
5.2.2	Vibration	no fire or explosion;	directions with amplitude of 0.38mm (10~30Hz) or 0.19mm
		Battery Voltage≥3.6V	(30~55Hz) and the scanning rate of 1 oct per min
	Drop	No leakage, no fire or	Batteries are dropped onto a hard board with the thickness of
5.2.3		explosion;	18~20mm from at least 1meter height. Drop the batteries from
5.2.5		Discharge Time>51 min	six different directions and discharge them at $1C_5A$ to
			end-voltage.
5.2.4	Low-pressure	No leakage, no fire or	Put the batteries in a sealed vacuum and reduce internal
5.2.4		explosion	pressure gradually to lower than 11.6 kpa. Keep for 6h

5.3 Safety Characteristics

No.	Item	Criteria	Test Instructions
			Put the batteries with thermocouple into the ventilation
			cabinet. Connect the polarities to constant voltage and
5.3.1	Overcharge	No fire or explosion	adjust the current to 3 C_5A , voltage to 4.8V. Charged the
			cells at $3C_5A$ current 20 ± 5 °C with a voltage limit of
			4.8V and Current approach 0 A.
			Put the batteries with thermocouple into the ventilation
		No fire or explosion;	cabinet. Batteries are short-circuited by connecting the
5.3.2	Short-Circuit	The maximum Temperature:	positive and negative terminals for 1h with a resistance
		150°C	load of $100m\Omega$. Watch the changes of temperature. Test
			the temperature of the batteries until it drops to 10° C.
			Cell is heated in a circulating air oven at a rate of
5.3.3	Heating	No fire or explosion	$(5\pm2)^{\circ}$ C per minute to $130\pm2^{\circ}$ C, and then placed for 30
			minutes at 130±2°C
			After full charge , place the battery in the temperature
			control box of $20\pm5^{\circ}$ C, do the following steps:
	Temperature cycle	emperature No leakage, no fire or /cle explosion	(1)Put the battery into test chamber of $75^{\circ}C\pm 2^{\circ}C$ and keep
5.3.4			for 6h.
			(2)Lower the temperature to -40 ± 2 °C and keep for 6h
			(3)Temperature conversion time is no longer than 30 min
			(4)Repeat the above three steps for 10 cycles.
Note: U	Note: Unless otherwise specified, all tests stated in this specification are conducted at the following condition		

Temp. : 20±5°C; Relative Humidity: 25%~85%.

6. Battery shipment voltage: 3.83~3.9V

7. Shelf Life

Shelf life of sample battery is 6 months (ex factory date); shelf life of product battery is 12 months (ex factory date).

8. Matters needing attention

Strictly observes the following notes. EEMB are not responsible for any accident due to the handling disagreed with this instruction.

- Strictly prohibits short circuit the (+) and (-) terminals with metals.
- Do not place Cell in a device with the (+) and (-) in reverse.
- Strictly prohibits pierce Cell with sharp objects such as a needle.
- Strictly prohibits disassemble the cell.
- Strictly prohibits welding a cell directly.
- Do not use a Cell with serious scar or deformation.
- Please read the user's manual thoroughly before usage, inaccurate handling of lithium ion rechargeable cell may cause leakage, heat, smoke, an explosion, or fire, capacity decreasing.

! Warning

- Strictly prohibits put cell into a microware oven, dryer, or high-pressure container.
- Strictly prohibits use cell with dry cells and other primary batteries, or new and old battery or batteries of a different package, type, or brand.
- Stop charging the Cell if charging is not completed within the specified time.
- Stop using the Cell if abnormal heat, odor, discoloration, deformation or abnormal condition is detected during use, charge, or storage.
- Keep away from fire immediately when leakage or foul odor is detected.
- If liquid leaks onto your skin or clothes, wash well with fresh water immediately.
- If liquid leaking from the Cell gets into your eyes, do not rub your eyes. Wash them well with clean edible oil and go to see a doctor immediately.

! Caution

- Before using the Cell, be sure to read the user's manual and cautions on handling thoroughly.
- Charging with specific charger according to product specification. Charge with CC/CV method. Strictly prohibits revered charging. Connect cell reverse will not charge the cell. At the same time, it will reduce the charge-discharge characteristics and safety characteristics, this will lead to product heat and leakage.
- Store batteries out of reach of children so that they are not accidentally swallowed.
- If younger children use the Cell, their guardians should explain the proper handling.
- Before using the Cell, be sure to read the user's manual and cautions on handling thoroughly.
- Batteries have life cycles. If the time that the Cell powers equipment becomes much shorter than usual, the Cell life is at an end. Replace the Cell with a new same one.
- When not using Cell for an extended period, remove it from the equipment and store in a place with low humidity and low temperature.
- While the Cell pack is charged, used and stored, keep it away from objects or materials with static electric charges.
- If the terminals of the Cell become dirty, wipe with a dry clothe before using the Cell.
- Storage the cells in storage temperature range as the specifications, After full discharged, we suggest that charging to 3.7~4.0V with no using for a long time.
- Do not exceed these ranges of the following temperature ranges:

Charge temperature range : 0° C to 45° C;

Discharge temperature range : -20 $^{\circ}$ C to 60 $^{\circ}$ C.

Store less than 1 month $:-20^{\circ}C - +60^{\circ}C$

Store less than 3 months $: -20^{\circ}C - +45^{\circ}C$

Store less than 1 year $:-20^{\circ}C - +25^{\circ}C$
